Z-PRO

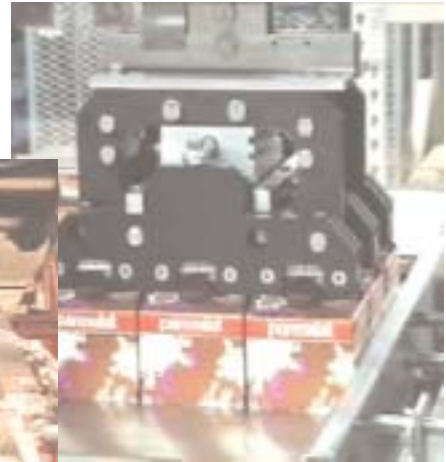

Gable-Style Case Packer

Thiele Technologies' Z-Pro Case Packer is the industry's most advanced and efficient dairy packer.

The Z-Pro was developed specifically to pack gable top cartons in standard plastic dairy cases and RSC cases. Its dual-head servo loading mechanism provides gentle product handling, and minimizes carton damage during operation.

The plastic case funneling and lift system verifies the case condition before loading. Bad cases are rejected, before being loaded, by the optional case reject system.

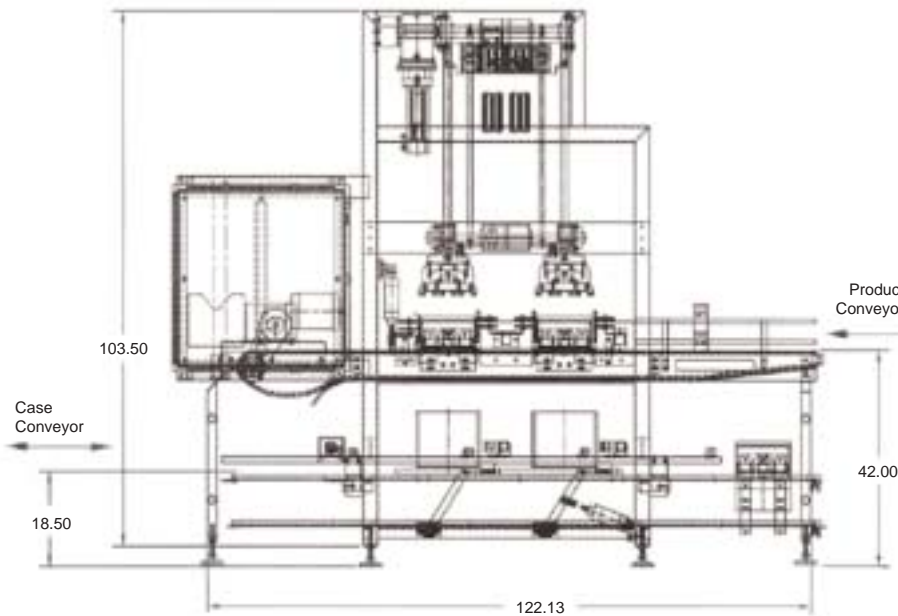

This system has demonstrated incredible savings, due to the virtual elimination of leaking or damaged cartons. Our customers have shown improved production efficiencies of up to 30% with this type of funneling system, paying back the cost of the machine in a fraction of a year.

Machine Specifications

Speed

Up to 16 cycles/minute

Case Size Range

Standard dairy case 13½" x 13½"
RSC cases (length x width) : 16" x 8"

Electrical Requirements

Input Power: 480VAC/60Hz/3-Phase
Electrical Consumption: 21 Amps
Control Voltage: 24VDC

Air Requirements

Operating Pressure: 80 psi (5.5 bar)
Line Pressure: 90 psi (6.2 bar)

Shipping Weight

Approximately 8,000 lbs (3,629 kg)

All sales are subject to our prevailing terms and conditions. Illustrations and specifications are subject to change without notice. Machines shown without guards are for illustrative purposes only. Guards are supplied and must be in place before installation.
