

Accelerated Product Stacker SWF AS 100

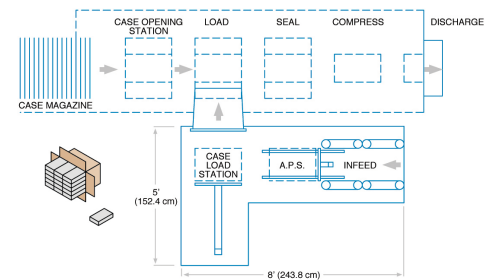

Key Features

- Achieves stacking speeds of more than 95 lifts per minute
- Multi-axis servo controlled lifting cleats
- Servo-driven, photo-eye controlled product infeed conveyors
- Integrated case loading mechanism
- Quick changeover
- Low maintenance
- Engineered for integration

Accelerated Product Stacker

SWF AS 100

The standard-setting, industry-leading AS 100 accelerated product stacker easily integrates with most case openers/sealers and is designed to increase performance on any new or existing case packing system. Its flexible design facilitates installation on site or at Thiele's Reedley, CA manufacturing facility, while its speed, coupled with no-tool fingertip changeover features, allows the AS 100 to easily adapt to ever changing product sizes and configurations.

Standard Features

- Integrates with most major case openers/sealers to provide a fully automatic case packing system
- Positive product metering
- Servo-driven stacking system with belt-mounted lifting cleats
- Precision stacking speed control
- Full operator safety
- Rugged precision construction
- Compact design

First layer of product, from the infeed conveyor, accumulates in a metered quantity inside the AS 100 stacker

Servo-controlled lifting cleats elevate completed layer as second layer of product is formed, all in continuous motion.

The complete case pack pattern is indexed to the case load station while first layer of next case load accumulates/elevates.
