- Compact footprint
- Easy line integration
- Quick product changeovers
- Packs various RSC, HSC and Display-style cases and trays
- Simple integration with Thiele's broad line of Tray/Case Erectors and Sealers
- Gentle product handling

Pick-and-Place Case/Tray Packers

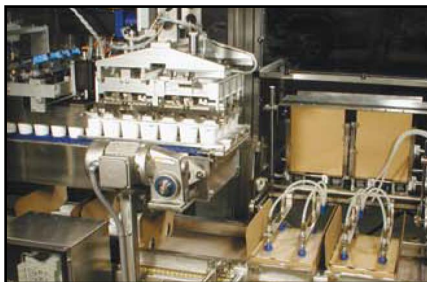

SWF TL Series

The SWF TL Series of top load casepackers are designed to handle a wide range of product styles, including cartons, tubs, bags and bottles. Interchangeable product gripping heads are custom designed for your application. These can include mechanical grippers, vacuum grippers or a combination of the two styles. Product placement options are also highly flexible, including RSC's, trays, plastic crates or layer pads.

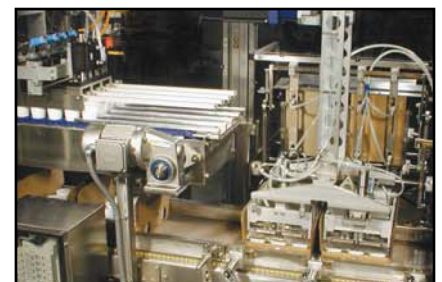

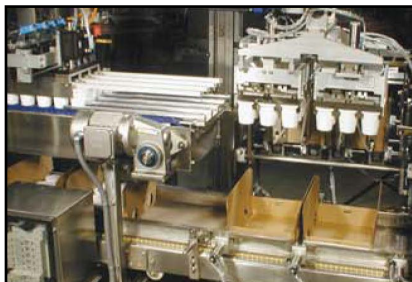

Multiple layout configurations are available to ensure optimization of your production space. In-line, reverse or right angle flow systems are all easily configured with the TL Series modular design. Integration with Thiele case erectors and sealers will create an entire packing solution. Wash-down construction options allow for installation within the processing area.

Additional Features

- Various gripper/pick heads customized to application
- Stainless steel construction
- Centralized grease blocks or automatic lubrication systems
- Product handling devices including converging, diverging, accumulating and positioning devices
- Servo controlled product indexing/accumulating feed conveyors
- Automatic case/tray positioning conveyor
- PLC Controlled
- Full operator safety
- Rugged, reliable low-maintenance construction
