

A THIELE TECHNOLOGIES COMPANY

POUR & LOK™

Key Features

- Press-to-close, foldable closure is applied to film in side gusset of package for **easy open Pour & Lok™**
- Roll stock with closure for Form-Fill-Seal packaging applications or pre-made bags and pouches
- Allows large openings for **scoopable** products
- Available as an **attachment to existing 1400 Hudson-Sharp Inno-Lok® and pouch machines.**
- Closure placement is offset to the side of the film to allow the package to travel through the Vertical Form-Fill-Seal machine with the closure at the top of the package
- Perforation and additional seal required on Vertical Form-Fill-Seal machine
- Available for use with **zipper and hook-to-hook type closures** such as Zip-Pak® 1679 and VELCRO® Brand PRESS-LOK™

The latest opening style from the INNO-LOK® resealable packaging family, Pour & Lok™ is the most innovative product to produce resealable side gusseted bags and pouches. This versatile resealable packaging style is ideal for Pet Food, Lawn & Garden, and Snack applications. Utilizing roll stock with pre-applied closure creates value by providing higher production rates, no reduction in processing speeds, less scrap, and less down-time. Rejuvenate your product offer with Pour & Lok™.

Pour & Lok™

Reclosable Pour Spout for Side Gusseted Packaging

Roll to roll or in-line operation provides film with pre-applied closure prior to making the package.

Film with pre-applied foldable closure in the unlocked position formed into a gusseted package.

Package with perforated header removed allowing pour spout to be opened.

Closure shown in flat orientation to allow closing of the package by folding and locking the closure. No need to tuck into gusset to close.
